Business trips only, starting between these dates (inclusive).

Distance is the tracker's GPS estimate, not a dashboard odometer reading. Odometer readings keep their own evidence.

Coverage is the share of each trip with a recorded position at least every 2 min. Lines between recorded positions are not verified roads.

Behaviour score: $100 - 5 \times \text{harsh braking} - 3 \times \text{harsh acceleration} - 3 \times \text{other harsh events} - 4 \times \text{overspeed episodes} - 0.5 \times \text{idle minutes}$, from the fleet settings. Scores are withheld below 90% coverage.

Human review applies: dismissed events do not deduct points and disputed events withhold the score. Event counts retain the original recorded observations.

Overspeed uses the fleet threshold of 100 km/h; road speed limits are not checked.

A booked driver is not proof of who drove. Drivers are shown as confirmed only after someone confirms them.
